Part D

CPCS Course (one of the following:)
Machine categories available include:

- Ride on Roller
- Forward Tipping Dumpers
- Telehandler
- Slinger

Delivered by face-to-face training*
Local test centre

As well as training for delegates who are new to the construction industry, our programmes are designed to upskill those who are already working within the sector. Whether you are looking to upskill your team, or you wish them to gain more knowledge and experience in a category that they are already accredited to operate, our programmes can provide your employers the knowledge, skills, and confidence to progress in your business.

The Skills Bootcamps will be delivered at employers' premises, and CPCS training at local agreed centres.

The Skills Bootcamp offers a flexible approach to training delivery. The machine category(ies) they will be trained on will be determined based on employer demand.

Progression Opportunities

Achievement of the Skills Bootcamp in Groundworks will enable learners to obtain a Blue CSCS Skilled Worker Card in Civil Engineering and a Red CPCS Trained Operator Card.

Funded by

Department for Education

* Employees must attend the training sessions to complete the course
